

HELP MAYOR ALEX PENELAS LOWER THE COST OF PRESCRIPTION DRUGS

Miami-Dade County Mayor Alex Penelas wants to bring affordable prescription drugs to Floridians. He believes that Floridians should not have to pay nearly twice as much as Canadians do for prescription drugs and that we should pay the same or less.

You can help Mayor Penelas urge the U.S. Food and Drug Administration (FDA), the U.S. Department of Health and Human Services (HHS), and our leaders in Washington so we can reverse current policies banning state and local governments from buying their medications for less in Canada, because EVERYONE deserves affordable prescriptions drugs. If you support making prescription drugs more affordable for all Floridians, then **PLEASE SIGN THE PETITION BELOW.**

Message to Congress and the Food and Drug Administration:

While we struggle to pay for the medications we need to stay healthy, our Canadian neighbors enjoy the same medications, made by the same drug makers in America, for half the price.

The time has come for our leaders in Washington, D.C., to help fellow American taxpayers and consumers by granting us access to prescription drugs that we are in need of at the same price available in Canada.
